

My family
My grandfather`s life story

Voronezh, 2023

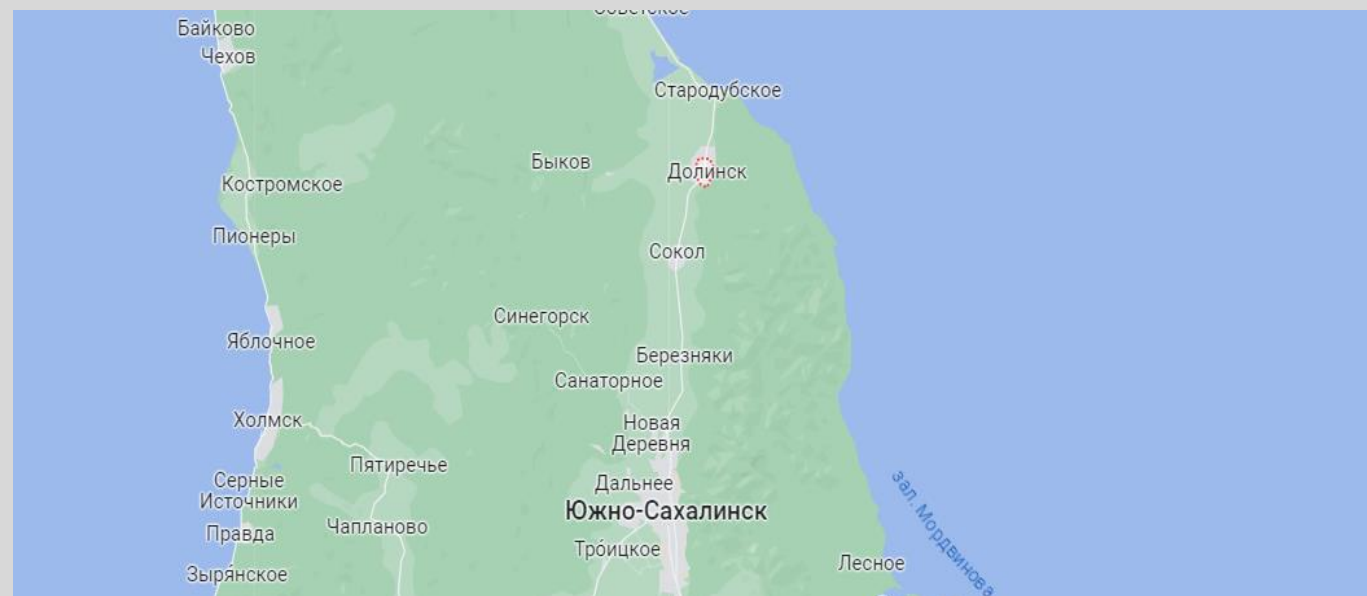

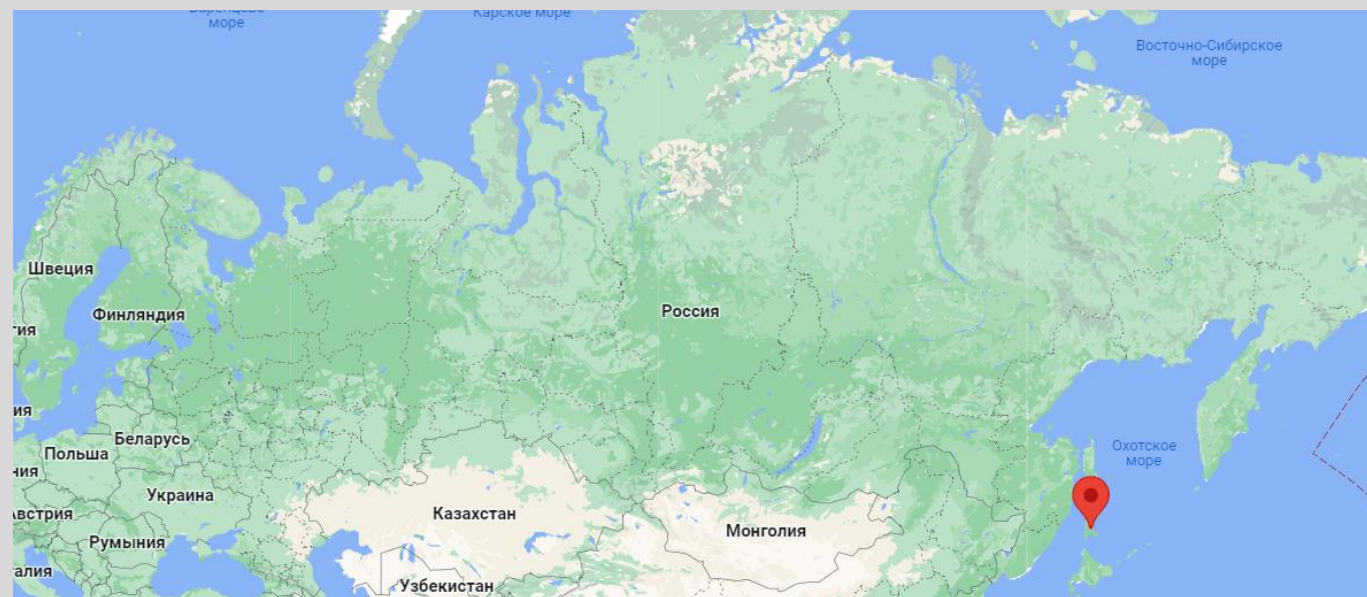

What I'm going to tell you about

1. Why is it important to preserve the experience of past generations?(introduce)
2. My grandfather's childhood
3. His youth and Adulthood
4. Information about his death
5. If I could ask my grandfather a question, what would I ask?

The oldest photo in the family archive. Is great-grandmother's of my uncle (from the beginning of the First World War).

Sakhalin Island is my homeland and the homeland of my ancestors

My grandfather's father

Grandpa and his mom - my great-grandmother Masha.

During his life, Grandpa traveled all over Russia, not only because of his service, but also because of his love of traveling. Been to Japan, China, off the coast of Canada, the Arctic Ocean.

His children, my mother and uncle, always remember him as a loving father and a kind man.

I would like to see him with my grandfather because I know more about him than any of my ancestors.

- Look at the world. Is this how you see the future?
- Are you proud of your son for realising his dream? Of all your descendants?
